Personal Finance

Simplified accounting for personal and business use.

Personal Finance

EXPERT
software

Personal Finance was written by a bank executive to provide people with a simple, straightforward means of balancing their books. So no accounting knowledge is needed to control your finances.

The program provides a unique method of keeping track of income, expenses, assets and liabilities. As you make entries, the program intelligently determines whether to debit or credit the accounts.

■ Many Financial Reports

Financial reports are always up-to-date and can be viewed or printed immediately:

- Detailed expense reports are useful for budgeting and tax preparation.
- The income statement shows your earnings versus your expenses.
- An assets versus liabilities report provides a picture of net worth.
- A trial balance shows you the books are balanced.
- A complete account history shows each transaction you made.

Personal Finance will help you know more about all the accounts that effect your financial status. It goes beyond a simple checkbook program to give you the complete picture. You can track the loans you have outstanding, the assets you own, as well as comparing income to your spending levels.

System requirements: IBM PC, Tandy and compatibles require 256K, DOS 2.1 or higher; Apple IIe, IIc, IIGS, IIcPlus and compatibles, 128K ROM, ProDOS; Commodore 64 or 128. 5.25" disk enclosed; 3.5" available for additional charge.
